About:

Valriya provides specification grade commercial, industrial, and architectural LED fixtures. We stock significant quantities of our core products, ship material quicker than anyone in the industry, and sell at competitive price points. We pride ourselves in our ability to do customization and modifications in-house and are willing and able to provide solutions that others will shy away from – much more than a box-in box-out brand. We routinely powder coat fixtures to spec and install accessories such as emergency backups, sensors, and networked controls for any size job. Over the past couple of years, we have scaled up significantly and have largely avoided supply chain issues through innovative and forward-thinking initiatives. Our primary focus is to serve our customers and agency partners with short lead times. We have strong, long-standing relationships with our contract manufacturers and have replicated many of their processes locally to provide a uniform product offering. We strive to be the quick and straightforward commercial lighting company on your line card, creating a hassle-free environment for our current and future NEMRA agencies.
